

Pharmacy Automation

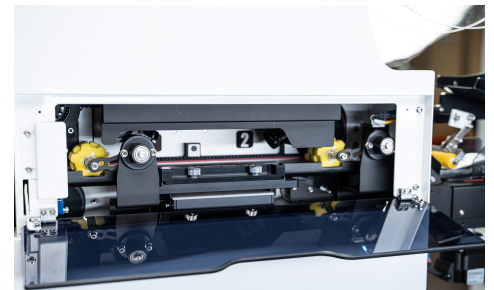

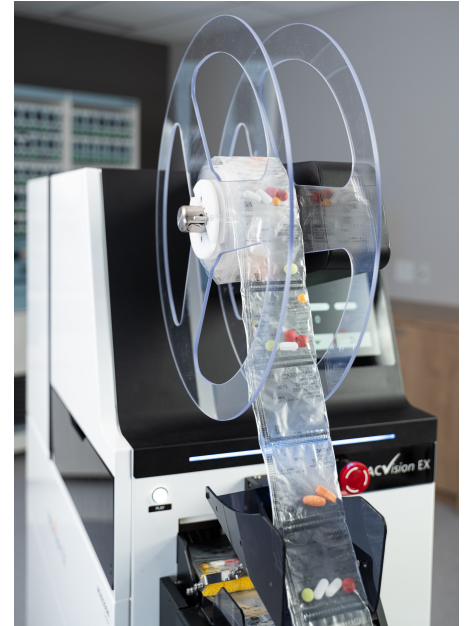

PACvision® EX

Clear images, confident decisions.

Inspect PACMED® pouches with confidence without slowing down production. PACVision EX uses advanced vision technology with AI to capture high-quality images and verify tablet count, size, shape, and color against prescription details. With high-speed inspection and a compact design, it helps pharmacies boost efficiency, save space, and keep the pharmacy running smoothly.

When PACVision EX pairs with PACMED, you get more than technology. You have a solution that combines fast, precise inspection with high-volume pouch packaging.

Speed

Safety

Accuracy

PACMED NS

PACvision® EX

i-Rolly

No more tangled pouches or manual winding. Keep pouches neat and ready to go.

PACVision EX Benefits

Speed

- Inspect up to 320 pouches per minute to keep up with production from multiple PACMED devices. That's 5 pouches per second!
- Speed up your process with the optional winding module that combines winding, cutting, and labeling in one compact unit.

Safety

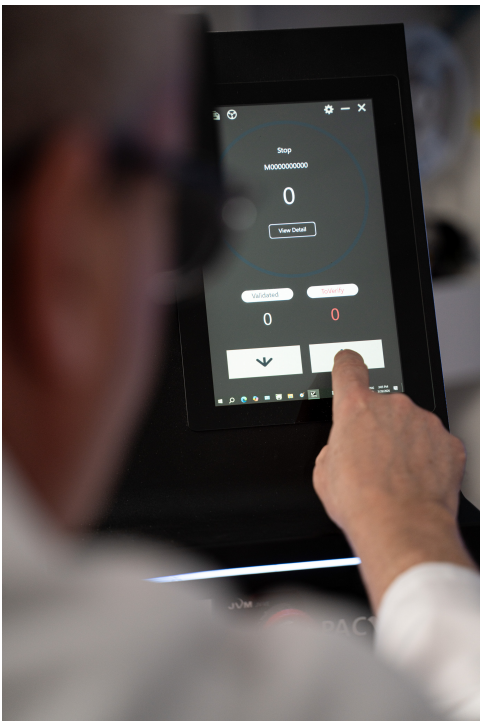

- Three high-resolution cameras capture every angle of each pouch, delivering complete visibility and confidence that every tablet is correct.
- Enhanced AI reduces false positives and improves precision by learning from past inspections.
- Quickly find pouch images to ensure traceability and patient safety.

Accuracy

- Automated inspection checks every pouch and alerts you if something looks suspicious, so patient safety is never compromised.
- Adapts to your lighting and environment for accurate color verification on every pouch.

PACVision EX Specifications

Dimensions	
Width	17 3/8"
Height	66 15/16"
Depth	46 1/16"
